

Biliousness

WHEN you have a bilious attack your liver fails to perform its functions. You become constipated. The food you eat ferments in your stomach instead of digesting. This inflames the stomach and causes nausea, vomiting and a terrible headache. Take Chamberlain's Tablets. They will tone up your liver, clean out your stomach and you will soon be as well as ever. There is nothing better.

Chamberlain's Tablets

TO MY PATRONS:

I appreciate the nice business you gave me the few short months I was in business last year, and can assure you that you will receive the same courteous treatment this year, and as long as I am in business in Hood River.

My store contains a raft of good groceries of the sort that you would enjoy if you delight in pure foods, and at the present I am running a special sale on many of the staple groceries and canned goods now in stock.

Yours for quality and service,

N. H. MacMILLAN

DAVIDSON TELLS OF APPLE MARKETS

The October and November car shortage, according to H. F. Davidson, has resulted in a loss to growers and shippers that will run into immense sums. In fact, Mr. Davidson declares that if the loss could be computed it would be sufficient to construct a great many refrigerator cars. Mr. Davidson writes:

"Lots of the recent arrivals of apples from the Northwest have showed heavy frost damage. Immense quantities of apples have been selling at auction at prices ranging from 75 cents to \$2.00 per box, not many above \$2. At private sales they have been bringing up to \$3.50, and there is a demand now for apples absolutely free from frost damage and in good sound condition at \$3 and \$3.50 per box. The bulk of the trade is being supplied with cheap apples."

"Usually only part of a car is affected by frost, but the whole goes at one price, and in this way the buyers get large quantities of absolutely good fruit. They sort them over, selling the frozen part at cost or a little profit, and then make a good strong profit on the good apples. This limits the demand for good fruit at fair prices. The principal handicap on the export situation is the low rate of exchange. We have been doing a little exporting with fair results, but conditions are not as good as last year. Steamship space is easy to get, and steamship lines have been reducing their rates from time to time but not enough to go very far toward overcoming the loss on the low rates of exchange."

"At this end we are much confused as to the amount of actual damage done by the recent freeze. If the cold weather actually froze any considerable quantity of apples, so that they cannot be shipped, it would have a stimulating effect on the market. On the other hand, if a great many apples are slightly frozen and are shipped after being thawed out, they are almost certain to arrive in damaged condition and will have the effect of keeping the market low for some time."

"One of the most serious things the Northwestern growers have to contend with, and the results will be far reaching in my opinion, is that the cars coming under heater service are protected by heaters which generate a gas in the cars which gives the apples a very unpleasant flavor and it is very common to hear people say that the flavor of the western apples is not nearly as good as the eastern apples. The character of the heater service is largely responsible for this, and the results are going to continue to be serious for many years to come, because people who try to eat apples flavored with coal oil smoke or coke are not very enthusiastic for some time afterwards about eating Northwestern apples. It is very important that some plan be provided for transporting Northwestern apples so they reach their destination in good condition both as to keeping quality and flavor."

WISCONSIN SPRUCES

UP, SAYS CHILDS

"Orchards of Wisconsin are sprucing up," is the summing up given by Leroy Childs after a visit to the University of Wisconsin at Madison. Mr. Childs was present recently at Madison for the ending sessions of the Wisconsin Horticultural College. He continues:

"The Wisconsin growers are eager to apply the most improved methods to their production. They are working on scab control and other problems. I found a number of men there who were formerly prominent in horticultural circles of the Oregon Agricultural College. E. J. Krause, H. F. Wilson and L. C. Giltner, all formerly faculty men at Corvallis, are with the University of Wisconsin. J. W. Roberts, an O. A. C. graduate, is extension horticulturist at Wisconsin."

Mr. Childs stopped at Madison on his return from St. Louis, where he attended the recent annual convention of the American Association for the Advancement of Science. About 1,000 delegates from every part of the United States and Canada were present. Mr. Childs was honored by the invitation to deliver an address before the department of entomologists, plant pathologists and horticulturists on "Comparative Results from Spraying Rods and Dusting in Codling Moth Control." He declares that it was inspirational to come in contact with leading men of his profession from all parts of the country.

CAR SHORTAGE NO LONGER IN EFFECT

The point was reached here last week when more cars were available than were being loaded by apple shippers. The Mount Hood railroad has secured an engine and is now prepared to handle a maximum of 30 cars per day in getting the heavy tonnage from its line to main line points. An average of about 12 cars daily, however, is being moved from the valley line.

Shippers are being urged to hasten loading of fruit from valley stations, as the extra locomotive now used in the short line service is an emergency engine and may be called back at any time.

Automobiles Repaired, Horses Shod

Another horseshoeing and blacksmith shop has felt the call of the automobile age, and W. L. Slutz and George Cooper, who operate a shop at Parkdale, have announced a garage annex. The men will have versatile workmen, who will be able to shoe a patron's horse or repair the electrical apparatus of his motor car. The Upper Valley men say they expect to establish an agency soon.

Within a short radius of Parkdale over 100 automobiles are owned, and the men say a demand for garage repair work has sprung up. When the Loop highway has been completed they expect to add storage space to their business.

Divorce Case to Be Heard Here

The case of C. B. Compton, who is seeking a divorce from Mrs. Mary Ellen Compton, although it was announced last week that the hearing would be transferred to Portland, will be heard here. R. C. Glanville, Mr. Compton's attorney, cites that a decree granted in Portland might not be valid, inasmuch as both parties have made the claim that Hood River county is their residence.

WHERE BETTER BEGINS

Better hides and better tanning are the beginning of the "Better" that goes all the way through Star Brand Shoes and all the way up from the bottom of the soles. Better tanning is the very groundwork of substance, the foundation of stability—it determines what shoes are made of. The Better that begins with making better leather is WORKED IN, SHAPED IN, SEWED IN, and summed up in shoes that serve better, feel better, look better, and last longer.
